Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is in response to communication filed on 1/9/2006.
2. Applicant elected Group I, consisting of claims 1-40.
3. Claims 41-42 should include the identifier –withdrawn-. Claims non-elected are presumed to be withdrawn. See 37 CFR 1.121

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. In claims 21-28, the term “permitting” do not positively recite the steps being performed. Correction required.

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

6. Claims 1-5, 9-10, 21-25, 29-30 are rejected under 35 U.S.C. 102(a) as being anticipated by Follis (6,092,806 hereinafter Follis).

With respect to claims 1, 4-5, 10, 21, 24-25, 30 Follis teaches a method for participation in a promotion program (Abstract). Acquiring a quantity of points (col. 7, lines 54-62); reviewing an upcoming real world event and reviewing a select set of possible outcomes for said event (col. 8, lines 41-63); selecting one of said select set of possible outcomes as a prediction entry (col. 9, lines 23 to col. 10, lines 1-27); associating said quantity of points with said prediction entry (see Figures 2A-2D);

Art Unit: 3622

awaiting an actual outcome of said upcoming real world event to determine whether said prediction entry might be a winning prediction entry (col. 12, lines 16-27); and if said prediction entry is a winning prediction entry, receiving a reward for making a winning prediction entry during participation in said promotion program (col. 13, lines 65 to col. 14, lines 1-6).

With respect to claims 2-3, 9, 22-23, 29 Follis further teaches downloading a login webpage and conducting a login process to initiate participation in said promotion program (col. 4, lines 31-37).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 6-8, 11-20, 26-28 and 31-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Follis.

Claims 6-8 and 26-28 further recite replacing said prediction entry with said adjusted prediction entry. Official notice is taken that it is old and well known in the computer related arts to replace or update or change certain entry in order to reflect the

user's change of mind. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included replacing said prediction entry with said adjusted prediction entry in order to achieve the above mentioned advantage.

Claims 11, 18-20, 31, 38-39 further recite purchasing an instant win product having an instant win code; entering the instant win code at an instant webpage and receiving results as to whether entry of said instant win code constitutes an instant win. Official notice is taken that it is old and well known to purchase an instant win product having an instant win code; entering the instant win code at an instant webpage and receiving results as to whether entry of said instant win code constitutes an instant win. For example, Turkey Hill offers a game code on selected, specially marked packages of Turkey Hill Dairy Ice Cream. The users have to go turkeyhill.com and follow the on-screen instructions to play the game. The game code will allow entrance into an online game. If you are drawn a winning message, you are the potential winner of the prize specified. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included recite purchasing an instant win product having an instant win code; entering the instant win code at an instant webpage and receiving results as to whether entry of said instant win code constitutes an instant win in order to obtain the above mentioned advantages. With respect to the product being an Online product it would have been obvious to replace the offline product with the Online product to obtain similar results.

Art Unit: 3622

Claims 12, 15, 32 and 35 further recite completing a survey and in response to completion of said survey receiving a reward. Official notice is taken that it is old and well known to receive a reward for completing a survey. For example, marketers would encourage customers or users to fill out a survey or questionnaire by given them free merchandise or items. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included completing a survey and in response to completion of said survey receiving a reward in order to achieve the above mentioned advantage.

Claims 13-14, 16-17, 33-34, 36-37, are rejected under same rationale as claims 11, 18-20 and 31 rejected above.

Claim 40 is rejected under same rationale as claims 11, 18-20, 31, 38-39 rejected above.
